To Bob Blazewicz
2B Quality Training Services

From John McMurray
Quality Control Manager

Dear Bob:

We wanted to take this opportunity to thank you for instructing and leading our group through the Geometric Dimensioning & Tolerancing course we completed earlier this month. It was a pleasure to have you teach the course, and all of our participants learned a great deal about the fundamentals and principles of GD&T.

Everyone found the sessions to be very informative and enjoyed the many examples and models, which help relate GD&T principles to the day-to-day environment of aluminum extrusions in which we work.

Several of the participants were taking a GD&T course for the second time, because they felt they had not grasped the concepts in their first attempt. They all said that the 2B course was fantastic, and had they taken your course first, there would not have been a need for a second one.

The course was informative and professionally delivered. The teaching materials and reference documents were excellent. If there is a need in the future for additional training in this area, we would not hesitate to use 2B Quality Training Services again.

Once again, thanks.

Best regards.
