To Whom It May Concern

Over the last 6 months Bob Blazewicz was contracted to provide in-house training on Geometric Dimensioning and Tolerancing according to ASME Y14.5-1994. Six separate classes have been taught that were attended by over 100 people. Although for years we had been using GD&T, we quickly found that the expertise that Bob brought to the class, gave us an enormous advantage.

Bob's concise use of language, and real life parts, illustrate the material being taught and make the class enjoyable and ensure all students were able to comprehend the material being presented. His knowledge of the Standard, both from a design, manufacturing and inspection perspective make him uniquely qualified to answer all questions brought forth in the classroom. His approach of emphasizing the purpose behind the use of the tolerances, has allowed many of our designers to better convey their design needs.

As a results oriented company, we tested all participants prior to training. The post training testing showed that all students showed a marked improvement (25% - 35%) regardless of their specific discipline or prior knowledge and experience of the standard.

Bob's flexibility proved invaluable, as we were able to spend more time on the aspects most useful to our company. Many barriers between internal departments were removed due to the in-depth discussions held within the multi-disciplined class.

The feedback from the students on the course was overwhelmingly positive. Many described the course as the best they had ever taken.

Sincerely,

A handwritten signature in black ink, appearing to read 'Nigel Doran', is written over a large, light-colored oval scribble.
