MEMORANDUM

Date 28-Aug-02

To Bob Blazewicz
2B Quality Training Services

From Darcy Boudreau
Senior Mechanical Designer [GD&T training co-ordinator]
Design & Fabrication Services

First let me say that it was a pleasure having 2B Quality to our campus to provide our first training session on Geometric Dimensioning and Tolerancing. All of the participants found the session to be very informative and “real world” in presentation and discussion. They particularly liked the way all aspects of GD&T were presented, with examples of inspection procedures/methods given for the GD&T functions. The participants found the course to be presented in a very professional, concise and friendly manner that was easy to follow and a pleasure to be involved in. We felt that all questions were answered to everyone's satisfaction, and that at the end of the day there was agreement about the recognition and use of the GD&T symbols and processes. I would like to say that these are the views of everyone of the participants.

The Design & Fabrication Service is looking forward to training the rest of our designers, machinists and toolmakers and we hope that 2B Quality will be able to provide this training for us.

Regards

Darcy Boudreau
